

*With verbatim CART captioning service, I can participate fully in my classes and lectures because I'm seeing everything that is said, as it's being said! Or if it's something like math, I can copy the formulas and then review the transcript later.*

This is a steno (shorthand) machine. With great accuracy, our CART captioners can keep up with speakers at well over 200 words per minute. Currently, this is the fastest and most reliable method of capturing the spoken word.

## Are you in charge of your own learning?

### FROM A SCIENCE LECTURE

*"A translocation complex drives the polypeptide into the lumen of the endoplasmic reticulum by an energy-driven process."*

If you're taking a technical course, or any course, and you can't hear, do you trust someone else to interpret it and then give you the gist? Remember that with point-form note-taking systems, you're relying on someone else's understanding. With our word-for-word service, you read every word as it's spoken, then review the transcript -- or not, as you wish.

Our verbatim CART captioners generate about 30 pages per hour compared to fewer than 10 with note-taking. With our CART service, it's all there. But don't let a lot of pages scare you. You can keyword search, cut-and-paste and/or annotate your transcript. The important thing is everything that was said is there. You're in charge of your learning; you get to decide what's important!

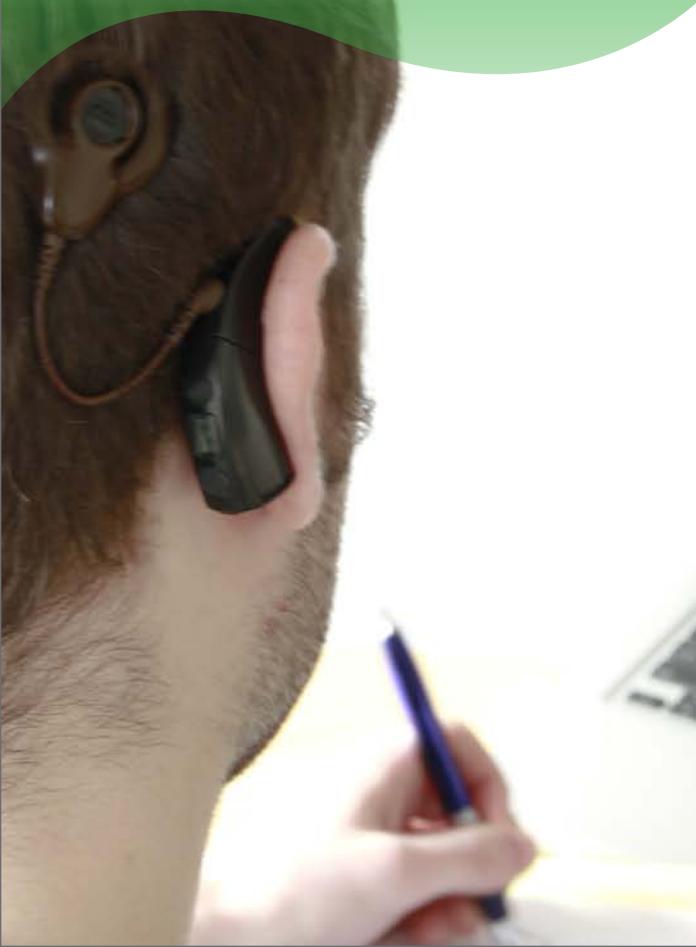

# Captioning for students with hearing loss

If you're a student with hearing loss and plan to attend a post-secondary institution, you'll need verbatim CART captioning!

Wherever you are, you can use a laptop, tablet or mobile device to confidentially read every word spoken, as it's spoken, then receive the transcript.

With Accurate's verbatim CART captioning, your access to education is equalized because you've ensured the same information as your class-mates.

### Our service

The industry term for our service is Communication Access Realtime Translation. The acronym is CART captioning.

Currently, no alternative technology provides every word, instantly and with such accuracy. Find the institution's disability services office. Ask for verbatim (word-for-word) CART by name.

### Be prepared and know your rights

Your energy should be spent learning, not struggling to catch every word. Do use all the technology and strategy available, but let us capture everything your instructor and class-mates say. All the other students hear what is said. You should, too!

### Where it's used

Accurate Realtime Inc. offers instant captions wherever you and the Internet are: in the class-room, lecture hall, after-school meeting, at home, or school-related conference, workshop, etc.

### How it's done

Our skilled CART providers are certified court reporters who have been specially trained to work with people with hearing loss. Not only do they understand your unique needs, but they are highly skilled in academic writing. The transcript can be made available for your review.

### What students are saying

*"Accurate Realtime...truly makes me feel like I am a part of the classroom learning. Without them, I would still be struggling to understand what others are saying."*

Joy, UBC, Education

*"CART has made it possible for me to have full access to information.... It is a central feature of my educational support system. CART has given me tremendous help during my university education."*

Rosalind, UBC, Faculty of Arts

*"Being able to know what my class-mates are saying, particularly those sitting behind me...is invaluable. CART has helped me understand what the professor is saying, no matter his accent or talking speed or lack of volume. No other services available have matched what CART has provided"*

Eugene, SFU
